Put

a

tub

outside

and

see

how much

rain

water

you can

catch.

Use

the

computer

to

find

next week's

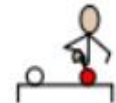

weather forecast

     
Go outside, count how many

    
trees you can see.

     
Add how many flowers you can

   
see to this?

     
Find a flower and count

    
how many petals there are.

   $3 \times 2 =$     
Can you multiply this my

**2**  
2?

    
Go for a walk and

   
take pictures of the weather or

  
sky.

    
Can you describe the

   
weather outside?
